

Vulnerability & Carbon Monoxide Allowance (VCMA)

Project Eligibility Assessment (PEA) *"The Hyde Community Hub"*

*Kerry Doyle Student Customer Safeguarding support
December 2022*

Updated – January 2025 (Aamina Vhora)

Gas Network Vulnerability & Carbon Monoxide Allowance (VCMA) Governance Document - Project Eligibility Criteria

Section 1 - Eligibility criteria for company specific projects (other than condemned essential gas appliance repair and replacement) In order to qualify as a VCMA project, a project must:	
VCMA Eligibility Criteria	Criteria Satisfied (Yes/No)
a) Have a positive, or forecasted positive Social Return on Investment (SROI), including for the gas consumers funding the VCMA project;	Yes
b) Either: <ul style="list-style-type: none"> i. Provide support to consumers in vulnerable situations, and relate to energy safeguarding, or ii. Provide awareness on the dangers of CO, or iii. Reduce the risk of harm caused by CO; 	Yes
c) Have defined outcomes and the associated actions to achieve these;	Yes
d) Go beyond activities that are funded through other price control mechanism(s) or required through licence obligations; and	Yes
e) Not be delivered through other external funding sources directly accessed by a GDN, including through other government (national, devolved or local) funding.	Yes
Section 2 - Eligibility criteria for company specific essential gas appliance servicing, repair and replacement projects In order to qualify as a VCMA project, unsafe pipework and essential gas appliance servicing, repair or replacement must meet the following criteria:	
a) A GDN has to isolate and condemn unsafe pipework or an essential gas appliance following a supply interruption or as part of its emergency service role;	Not Applicable
b) The household cannot afford to service, repair or replace the unsafe pipework or essential gas appliance; and;	Not Applicable
c) Sufficient funding is not available from other sources (including national, devolved or local government funding) to fund the unsafe pipework or essential gas appliance servicing, repair or replacement.	Not Applicable
Section 3 - Eligibility criteria for collaborative VCMA projects In order to qualify as a collaborative VCMA project, a project must:	
a) Meet the above company specific and boiler repair and replace (if applicable) project eligibility criteria;	Not Applicable
b) Have the potential to benefit consumers on the participating networks; and	Not Applicable
c) Involve two, or more, gas distribution companies.	Not Applicable

Information Required	Description
Project Title	'The Hyde Community Hub' Centre for Warmth
Funding GDN(s)	Cadent
New / Updated	Updated January 2025
Role of GDN(s) *For Collaborative VCMA Projects only	Not applicable – Cadent company – Specific project
Date of PEA Submission	December 2022 Updated: January 2025
VCMA Project Contact Name, email and Number	Name: Phil Burrows Title: Head of Customer Vulnerability Social Programme delivery Email: Phil.m.burrows@cadentgas.com Number: 07773 545451
Total Cost (£k)	Centre costs: £110,000.00 Slow cooker costs: £7,674.00 (60x small £15.55 and 100x large slow cookers £27.84) Overall VCMA: £117,674.00 <u>Updated January 2025 – Additional costs</u> Centre costs: £63,000 Slow cookers: £334.08 Leaflets: £1,763.64 Project Management cost: £2,603.90 Total: £67,701.62
Total VCMA Funding Required (£k)	£117,674.00 <u>Updated January 2025</u> £185,375.62
Problem(s)	Hyde is an area located on Cadent's North West network and has high levels of deprivation. Hyde is one of the highest deprived areas across Cadent's network. High levels of deprivation are often linked to much wider issues such as fuel poverty, fuel debt, increase carbon monoxide risk and financial adversity. Fuel Poverty ¹ Approximately 14% of households in Tameside are in fuel poverty and 15% are struggling with food insecurity. More residents are exposed to fuel poverty due to the cost of living and fuel crisis. People living in fuel poverty are more likely to be unemployed and on lower household income. Consequently, reducing the quality of

¹ 43% of children in Tameside's most deprived area living in poverty - Quest Media Network - Tameside Radio, Tameside Reporter, Oldham Reporter, Glossop Chronicle

	<p>life as house owners are having to turn their heating down or completely off. Increasing, moisture and damp within the house. Resulting, in increased health conditions such as respiratory issues and heart problems, putting strain on front-line services.</p> <p><u>Fuel Debt</u> Those facing fuel debts are more likely to be living in low-income household. Due to the cost of living and fuel prices rising to a high, many households are finding themselves in unmanageable debt forcing them into a position to choose between heating their home or having a hot meal. Living in cold damp conditions can result in an increase of conditions such as respiratory problems, heart failure and diabetes.²As, low income-households have staple diets that are high in salts, sugars, and fats, putting strain on front-line services.</p> <p>Considering, alcohol, drug abuse, low income, and mental health, the likelihood of people being in debt is huge. Seeking advice on debt is daunting for some people as they believe there is a stigma to seeking debt advice or they do not know how to access help.</p> <p><u>Unemployment</u> Majority of Tameside's population is unemployed or on a low household income. Low academic achievements and low skills for the workplace result in low employability opportunities.³ 4,500 people are unemployed in Tameside and 52.2% have no qualifications, resulting in low inadequate household income.⁴ Those who are born into a household with unemployed parents, are more likely to achieve low academic achievements. Young people living in poverty face inequalities in education as they are disadvantaged in accessing support and facilities.</p> <p><u>Social Isolation</u> Social Isolation can lead to conditions such as depression, anxiety, and mental health conditions. Residents of Tameside face social isolation due to language and cultural barriers. This can make it difficult for those facing fuel poverty to seek help, as they feel isolated and an outsider to the community, they are living in.⁵ Language barriers hinder people's ability to seek help as, many fear being misunderstood. This puts strain on front-line services as they turn to the council for advice on how to claim benefits they are entitled to.</p> <p><u>CO Education</u> ⁶ Every year around 40 people die of carbon monoxide poisoning. An additional 4,000 people attend accident and emergency each year</p>

	<p>as a result of carbon monoxide poisoning. 2,000 people are left hospitalised.</p> <p>High fuel poverty and household debt can have significant impact on a customer's risk of exposure to the dangers of carbon monoxide. As there is a lack of awareness and understanding of CO safety. Those in low-income households do not have sufficient income to have their gas appliances serviced regularly. Putting their lives at risk as they are oblivious to any faults with gas appliances and unaware of the serious harm CO can cause.</p> <p><u>Updated January 2025</u></p> <p>The project's continuing success presents the need and opportunity for Hyde Bangladesh Welfare Association to continue to effectively support one of Tameside's most deprived inner-city wards.</p> <p>Due to low skills for the workplace and corresponding high unemployment rates, there is a need to address the lack of activity available for the community to engage with and develop themselves in a way that ensures they are not compounded by language and cultural barriers.</p> <p>Furthermore, the level of current achievement indicators and level of child poverty indicators show significant inequality experienced by children and young people of Hyde's target areas. It is therefore important to ensure that children and young people are not placed at a disadvantage in terms of education, support and availability of facilities.</p> <p>The Hyde project extension will improve community cohesion, by utilising a multi-layer approach to assist people with varying social, economic or other disadvantages, which directly link to the requirement for income maximisation and energy efficiency support.</p>
Scope and Objectives	<p><u>Project scope</u></p> <p>Cadent will provide Hyde community Hub located in Hyde, Tameside with £117,674.00 VCMA funding to deliver a two-year project.</p> <p>The two-year 2022-2024 agreement replicates other Centre For Warmth, whereby specialist advisors are employed using the VCMA funding.</p> <p>In addition, the centre will also provide essential information on energy efficiency and carbon monoxide safety. Offering income maximisation advice and registering appropriate clients onto the priority services register. Likewise, providing a 'blend café' where families can come together in a warm safe space and learn how to cook healthy meals.</p> <p>The project will be to fund two full time positions, an Information, Advice and Guidance Service (Customer Service Advisor) and a community hub (Centre manager).</p> <p><u>Project Objectives</u></p>

	<p>The objectives below are what Cadent will use to measure the success of the Centre For warmth:</p> <ul style="list-style-type: none"> • Support around 16,000 clients over the two-year period through this project. • The centre will deliver Carbon Monoxide advice to around 4000 clients that come into the centre. • The centre will reach around 4000 people on energy efficiency over the 2-year project. • The centre will reach around 4000 clients with income maximisation advice and advocacy. • The centre will reach 4,000 raising awareness of the PSR and eligible households registering with the support of centre staff. <p><u>Updated January 2025</u></p> <p>Cadent will provide Hyde with an additional £67,701.63 for a 14.5-month extension. The funding will enable the centres to provide additional services as listed below.</p> <p><u>Project Objectives</u></p> <p>The success of the project will be measured against achieving the below objectives:</p> <ul style="list-style-type: none"> • Deliver PSR advice to 80 individuals. • Register 24 individuals to the PSR. • Provide energy efficiency advice to 750 individuals via in depth one-to-one (or group) conversations. • Provide energy efficiency advice to 5,000 individuals through social media. • Provide 1,100 individuals with income maximisation services. • Provide 12 slow cookers as individual needs emerge. • Provide CO awareness conversations to 250 individuals. • Provide CO awareness and education to 5,000 individuals through social media. • Distribute 100 CO alarms. • 126 individuals will attend the centre and have a conversation with others, alleviating loneliness and isolation.
<p>Why the Project is Being Funded Through the VCMA</p>	<p>Cadent believes this project meets all the Vulnerability and Carbon Monoxide Allowance eligibility criteria:</p> <p>a) Social return on Investment (SROI) is forecasted to be positive. We believe that this project has the deliverables to create positive SROI including for the gas consumers funding the VCMA project:</p> <p>The project delivers a positive forecasted return on investment based on achieving the target for registrations to the PSR and carbon monoxide education.</p> <p>b) The project will either:</p>

	<ul style="list-style-type: none"> i. Provide support to consumers in vulnerable situations, and relate to energy safeguarding, or ii. Provide awareness of the dangers of CO, or iii. Reduce the risk of harm caused by CO <p>The project needs to meet all three elements of the criteria. Offering support to customers living in vulnerable situations through energy efficiency advice, carbon monoxide education and PSR conversations.</p> <p>c) Project has defined outcomes and associated actions to achieve these:</p> <p>The projects' defined outcomes have been agreed upon by Cadent and Hyde Community Hub following the service agreement. Further information can be found in the appropriate section below.</p> <p>d) The project goes beyond the activities funded through the price control mechanisms or required license obligations.</p> <p>This method of delivering support to customers living in vulnerable situations falls outside the scope of Cadent's BAU activities. This project utilises partnerships with community stakeholders to reach communities with Cadent messaging to benefit those customers who are difficult to reach.</p> <p>e) Not be delivered through other external funding sources directly accessed by a GDN, including through other government (national, devolved, or local) funding.</p> <p>Delivered solely through Cadent's VCMA funding.</p>
Evidence of Stakeholder/Customer Support	<p>'The Hyde Community Hub' Centre for Warmth aims to offer those living in vulnerable situations support. Especially BAME communities, older people and those who live alone.</p> <p>This project aims to help wider communities who have language and cultural barriers. Especially those from BAME communities and people with disabilities. Also, providing support for children who are from low-income families to access educational facilities/support. Enhancing quality of life and employability.</p> <p><u>Hyde Community Hub's main strands of focus:</u></p> <ol style="list-style-type: none"> 1. To provide excellent community advice which will enhance and contribute to the quality of life of residents living in Hyde, Tameside. 2. The Centre for Warmth partnership with Hyde Community Hub will allow Cadent to support fuel poor households in a holistic approach. Clients will receive a combination of services such as energy advice debt management and benefit entitlement checks. All of which are designed to help residents better manage their energy and increase their household income. 3. To provide a service to ensure income maximisation through debt and money management, benefit entitlement checks and employability skills. <p><u>Aims and Objectives</u></p>

	<p>Tackling fuel poverty, social isolation and promoting awareness of carbon monoxide, recognising these as important issues in communities.</p> <p>Promotion of social inclusion within the community working closely to those who face exclusion and building more relationships with local people. Helping address fuel debt, fuel efficiency and hardship issues. Developing members of that community with the skills to assist, integration/involvement in society, reducing isolation and improving quality of life. Spreading awareness of available services and benefits clients are eligible for.</p> <p>Provision of advice, information, and support to members of the community. By engaging with service providers and multi agencies to help adapt services and activities to benefit the needs of the community.</p> <p>Provide Carbon Monoxide safety advice and awareness, fuel poverty/debt and energy efficiency advice through the community hub.</p> <p><u>Updated January 2025</u></p> <p>The Department for Energy Security and Net Zero found that 13% of households, or 3.17 million households, were fuel-poor in 2023. In real terms, the average fuel poverty gap of £ 417 also increased from £348 in 2022.⁷</p> <p>Households in fuel poverty depend on the interaction of key drivers, including energy efficiency measures and income maximisation. Energy efficiency measures lifted 112,000 households out of fuel poverty between 2022 and 2023. Due to income maximisation, low-income households grew faster than the median income in 2023, reducing fuel poverty. Rising housing costs partially offset this. In 2023, energy prices rose, moving 28,000 households into fuel poverty.⁸</p> <p>The vital role of Hyde: Quote from Centre Manager.</p> <p>“Hyde Centre for Warmth brings people together, builds strong relationships in and across communities and helps to improve the places and spaces that matter to them. The project will enable more people to fulfil their potential by working to address issues at the earliest possible stage. We will continue to support people most adversely impacted physically and psychologically, to help people to become more resilient to respond to new and future challenges. The hub will work as a link between mainstream service provider multi agencies and deprived local communities, and ultimately provide a platform to empower people, especially women and the most vulnerable.”</p>
Information Required	Description

⁸ <https://www.gov.uk/government/statistics/fuel-poverty-factsheet-2024>

<p>Outcomes, Associated Actions and Success Criteria</p>	<p>The VCMA project forms part of Cadent's wider Centres for Warmth network. The Centre for Warmth project model ensures resources, materials and VCMA funding are allocated to a community centre located in an area of high deprivation. Enabling the community centre to enhance and expand existing support for customers living in vulnerable situations.</p> <p>This project will be delivered in partnership with Hyde Community Hub and aims to support around 16,000 clients with energy/safety/health/ loneliness issues over a 2-year period.</p> <p><u>Project Outcomes</u> 'The Hyde Community Hub' Centre for Warmth project aims to achieve the outcomes listed below:</p> <ul style="list-style-type: none"> • Provide local residents with energy efficiency advice, carbon monoxide and general gas safety and registration onto the PSR. • Provide advice and advocacy on subjects such as maximising income, debt/money management, benefits, education, employment, and health. • Provide slow cooking classes to promote efficiency, affordability, and health benefits. • Providing support and advice to anyone deemed vulnerable; BAME communities, elderly residents, residents with a disability and isolated people. <p><u>Associated Actions</u> To deliver the project outcomes the following actions will be implemented:</p> <ul style="list-style-type: none"> • The project will tackle loneliness and social isolation • An increased awareness of carbon monoxide safety and the dangers of the poisonous gas. There will be reduced risk of harm to Carbon Monoxide and a decrease in hospital admissions. This will be accomplished by centre staff having conversations on Carbon Monoxide with residents and distributing audible Carbon Monoxide alarms to the households at greatest risk. • Increased levels of awareness in specific topic areas and an increase in household income. Cadent will fund one full-time advisor to support clients on benefit entitlement checks, debt, social welfare, Carbon Monoxide safety and energy efficiency. Households will be on maximum income as entitled benefits will be identified and claimed with specialist support. <p><u>Success criteria</u></p> <p>The project's success will be assessed against the Projects objectives:</p> <ul style="list-style-type: none"> • Approximately 16,000 clients will be reached through the project across the initial 2-year period. • Around 4000 clients will receive specialist advice on identifying and accessing previously unclaimed benefits.
---	--

	<ul style="list-style-type: none"> • Around 4000 clients will receive awareness on Carbon Monoxide dangers and how to keep safe. • Around 4000 clients having an awareness of the PSR and eligible households registering with the support of centre staff. • Around 4000 clients will receive energy efficiency advice. <p><u>Updated January 2025</u></p> <p>The additional services listed below will be provided via Hyde Centre for Warmth. The community hub manager and customer service advisor will deliver services and activities to address vulnerabilities experienced by people within the community covering the full demographic.</p> <p><u>Associated Actions:</u></p> <p>The additional funding will enable the centre to extend for an additional 14.5 months to ensure the Centre for Warmth project can continue running.</p> <p>Hyde will continue to deliver the core aspects of the project and build upon existing relationships and services, for example continuing to improve wellbeing and increasing accessibility of services.</p> <p><u>Success Criteria</u></p> <p>The success of the project will be measured against achieving the additional objectives below:</p> <ul style="list-style-type: none"> • Deliver PSR advice to 80 individuals. • Register 24 individuals to the PSR. • Provide energy efficiency advice to 750 individuals via in depth one-to-one (or group) conversations. • Provide energy efficiency advice to 5,000 individuals through social media. • Provide 1,100 individuals with income maximisation services. • Provide 12 slow cookers as individual needs emerge. • Provide CO awareness conversations to 250 individuals. • Provide CO awareness and education to 5,000 individuals through social media. • Distribute 100 CO alarms. • 126 individuals will attend the centre and have a conversation with others, alleviating loneliness, and isolation. <p>These figures are included in the SROI calculation below.</p>
Project Partners and Third Parties Involved	Cadent will work in partnership with Hyde Community Hub to deliver the project.
Potential for New Learning	The 'Hyde community hub' Centre For Warmth project offers several areas of potential learning that Cadent can adopt for other VCMA funded projects in RIIO-GD2.

	<p>One of the main rationales behind funding the project is the number of residents living in deprived and vulnerable situations. In 2022, there have been significant rises in fuel and cost of living. Through the VCMA funding, Cadent can support these challenges faced by communities in 2022, with findings shared across Cadent's VCMA programme.</p> <p><u>Updated January 2025</u></p> <p>This vital support will continue to enable the centre to address fuel and food insecurity, ensure that individuals claim all they are entitled to, and continue to support the most vulnerable.</p> <p>Cadent will continue to listen to the centre's feedback as we have done with the extension model, by ensuring the funding is more flexible to meet each centre's unique needs.</p>
Scale of VCMA Project and SROI Calculations	<p><u>The scale of the VCMA project</u></p> <p>Cadent will invest £117,674.00 in partnership with Hyde Community Hub for the project "Hyde Community Hub Centre For Warmth. Delivering support and a range of services to 16,000 clients over a two-year period.</p> <p>Total investment £117,674.00 GBP</p> <p>SROI Calculations:</p> <p>Investment: £117,674.00</p> <ul style="list-style-type: none"> • 2000 clients supported with benefits and debt advice: £3,434,220.00 • 2000 client's energy efficiency advice: £735,540.00 • 2000 clients advised on CO: £17,455.47 • 2000 PSR sign-ups: £287,780.00 • Social isolation and loneliness: £2,208,000.00 • Total reach of around 4,000 per year <p>*Per annum</p> <p>5-year gross present value= £6,682,995.47 5-year Social Return on Investment = £6,565,321.47</p> <p>1- year Gross Present Value=£1,336,599.09</p> <p>1-year Social Return on Investment =£1,313,064.29</p> <p>(minus investment Centre costs: £110,000</p> <p>Slow cooker costs: £7,674.00 (60x small £15.55 and 100x large slow cookers £27.84)</p> <p><u>Supporting households to maximise their income</u></p>

	<p>Cadent worked with SIA Partners to evaluate the average 5-year gross present value of supporting households to maximise their income. SIA Partner's based their analysis on the "actual" data from a 3-month project between Cadent and NEA, and historic data from NEA over the past 3 years.</p> <p>SIA Partners calculated an average 5-year gross present value of supporting households to maximise their income of £171.11 per household and £3,434,220.00 across the average 4000 clients over the 5 years.</p> <p><u>Educating customers on the dangers of carbon monoxide</u> Cadent also employed SIA Partners to evaluate the forecasted social return on investment of several RIIO-GD2 business plan elements. These elements included CO education, CO alarm distribution and the repair/replacement of gas appliances.</p> <p>SIA Partners pointed to a number of factors that influenced the social value generated by educating customers on the dangers of carbon monoxide:</p> <ul style="list-style-type: none"> • A reduction in A&E visits linked to CO; • A reduction in long-term hospitalisations linked to CO; • A reduction in deaths caused by CO; • A reduction in time off work due to injury caused by CO; • A reduction in ambulance call-outs linked to CO; <p>SIA Partners calculated the average 5-year gross present value of a Co-educational conversation to be £8.73 - this is based on a 1-2-1 conversation with an 80% retention rate.</p> <p><u>Supporting households to register to the Priority Services Register</u> Cadent worked with SIA Partners to evaluate the average 5-year gross present value of supporting households to register to the PSR. SIA Partner based their analysis on the DNO proxy bank value for an avoided stress management course.</p> <p>SIA Partners evaluated an average 5-year gross present value of £143.89 for a single PSR registration and an average of 5 - year gross present value of 2000 PSR sign-ups £287,780.00</p> <p><u>The Cost of loneliness</u> The Centre for Warmth project will reach customers living in urban areas of Cadent's network.</p> <p>⁹BBC report found that 46% of England's urban population are aged 65 or over.</p>
--	---

⁹ <https://www.bbc.co.uk/news/uk-43316697>

	<p>¹⁰One-fourth of the population aged 65 years and older reported feelings of loneliness.</p> <p>¹¹Social Psychiatry and Psychiatric Epidemiology reported a net present value of £6,000 for people who reported being lonely most of the time. This figure was across a 10-year period and equates to £600 per annum. This research concluded that older people who feel lonely are at greater risk of developing conditions such as dementia and depression.</p> <p>¹²The health foundation reported that 21% of older people who live alone, or face feelings of loneliness visit their GP at least once a month. This places pressure on front-line services since many people who experience loneliness think of their GP as someone they can relate to and who will listen to them, engaging in an open, friendly dialogue.</p> <p>The centres For Warmth project aims to reach 16,000 urban customers. 46% of which will be aged 65 and over. This equates to 7,360 customers.</p> <p>¹³Campaign to end loneliness reported that over 700,000 people aged 65 and over are experiencing feelings of loneliness. 46% of this age group living in urban areas this equates to 322,000 people.</p> <p>Social Psychiatry and Psychiatric Epidemiology research suggests a potential saving of £600 per annum for each older customer supported that was previously experiencing feelings of loneliness.</p> <p>The Centre for Warmth project will run for 2 years, equating to a saving of £1,200 per customer.</p> <p>1,840 customers report being lonely most of the time: (£600 x 2) x 1,840</p> <p>This equates to an overall benefit of £2,208,000.00 across the entire customer group supported through the project.</p> <p><u>Updated January 2025</u></p> <p>Cadent will invest a further £67,701.62 to extend the partnership with Hyde Centre for Warmth.</p> <p>For the full duration of the project, including the original and extension, Cadent will invest £185,375.62.</p> <p>The figures from the original project have been taken from the actual data reported by the centre, as the original figures were based on an estimate.</p> <p>Total investment = £185,375.62</p> <ul style="list-style-type: none"> • 2,861 individuals will receive income maximisation advice = £4,912,651.71 • 2,031 individuals will receive energy efficiency advice = 746,940.87
